1. Product Overview

Attribute	Detail
Product Name	Mentorino
Creator / Mentor	Peter Mannarino
Tagline	Premium career, education, and life guidance mentorship
Target Audience	College students, recent graduates, career-changers
Value Proposition	1-on-1 strategic guidance covering career, education, and life decisions through a structured mentorship pipeline
Business Model	Premium mentorship programs + digital product sales (The Vault)

Tech Stack

Layer	Technology
Frontend	React 19 + TypeScript + Vite 6
Styling	Tailwind CSS 4
Routing	React Router DOM v7 (lazy-loaded, animated transitions via Motion)
State Mgmt	TanStack React Query v5 (server) + React Context (auth)
Forms	React Hook Form v7 + Zod v4
Backend	Netlify Functions (serverless)

Layer	Technology
Database	Supabase (PostgreSQL) with Row Level Security
Auth	Supabase Auth (email/password)
AI	Google Gemini 2.0 Flash
Email	Resend API
Analytics	PostHog
Error Tracking	Sentry
Hosting	Netlify (SPA)
CI/CD	GitHub Actions

2. User Roles & Permissions

Role Hierarchy

Visitor (public) → Student/Member (approved app) → Mentor (staff) → Admin (super user)

Permissions Matrix

Feature Area	Visitor	Student	Mentor	Admin
Landing, About, Programs, FAQ, Contact	✓	✓	✓	✓
Apply for mentorship	✓	—	—	—

Role-Based UI Routing

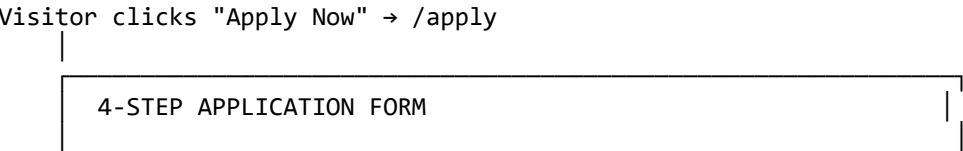

Role	Dashboard Component	Navigation Items
Student (user)	UserDashboard	Overview, Sessions, Vault, Guidance, Settings
Mentor (mentor)	MentorDashboard	Dashboard, Audits, Events, Mentees, Reviews, Accounts
Admin (admin)	AdminDashboardWrapper	Dashboard, Applications, Students, Sessions, Activities, Networking, AI Console, Validation, More

3. Full User Journey / Lifecycle Flow

Phase 1: Discovery (Visitor — No Account)

Phase 2: Application (Visitor → Applicant)

Step 1: Profile & Goals

Mentor type:	[dropdown selector]
Full name:	[text input]
Phone:	[country code + number]
Email:	[email input, validated]

Step 2: Meeting Preference

☐ Virtual	☐ In-Person	☐ Hybrid
Frequency: ☐ Weekly	☐ Bi-weekly	☐ Monthly

Step 3: Goals & Seriousness

Goals:	[textarea, multi-line]
Seriousness:	[] (1-10 slider)

Step 4: Commitment

☐ I understand this program is selective
☐ I authorize a background check
[Submit Application]

Result A: Duplicate email found

- Error: "You have already submitted an application"
- Show current application status page:
 - "Pending" – "Under Review, Awaiting Feedback"
 - "Approved" – "Proceed to sign up"
 - "Rejected" – "Application was not accepted"

Result B: New application – Success

- Insert into `applications` table (status: 'pending')
 - Rate limit: 1 application per 24h per email
 - Email sent: application_submitted template via Resend

Phase 3: Review & Decision (Mentor/Admin Side)

Mentor/Admin logs in → /dashboard

- [Mentor] → Inquiry Audit tab → Pending applications list

- Each entry: name, email, date, mentor type, status badge

- [Admin] → Applications tab

- Full list with status badges (pending/approved/rejected/deleted)

- Click application → Detail modal

- User info (name, email, phone)

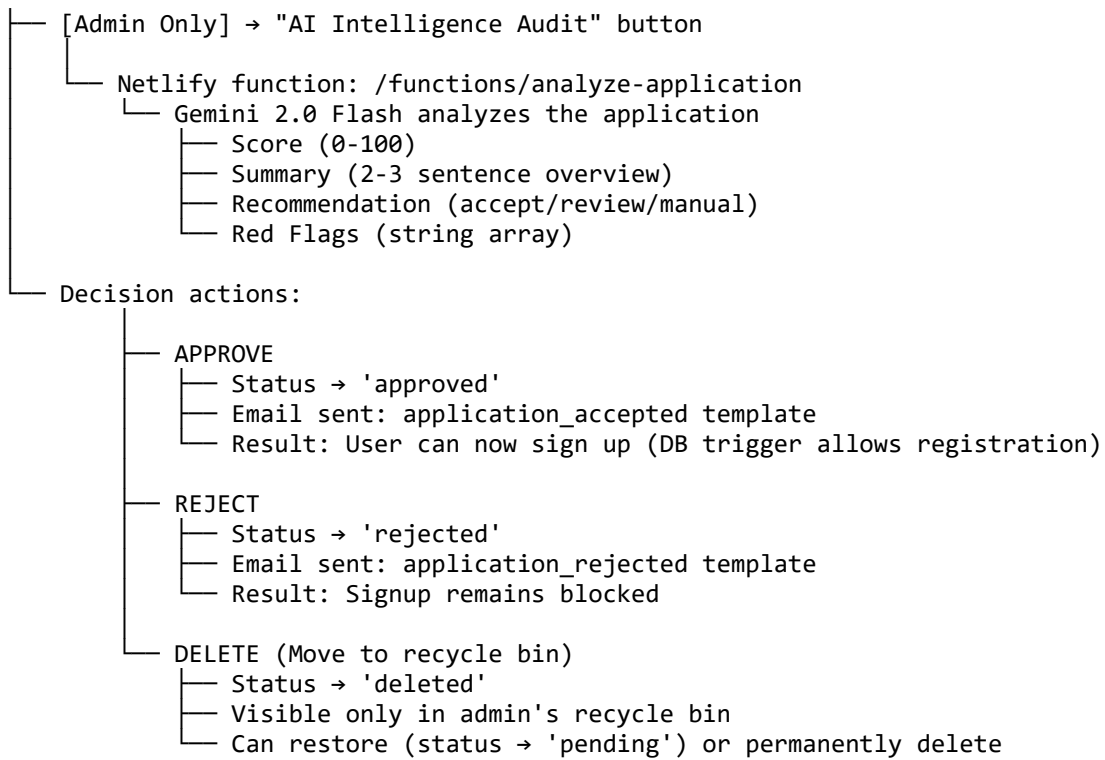

- Mentor type selected

- Meeting preference + frequency

- Goals (full text)

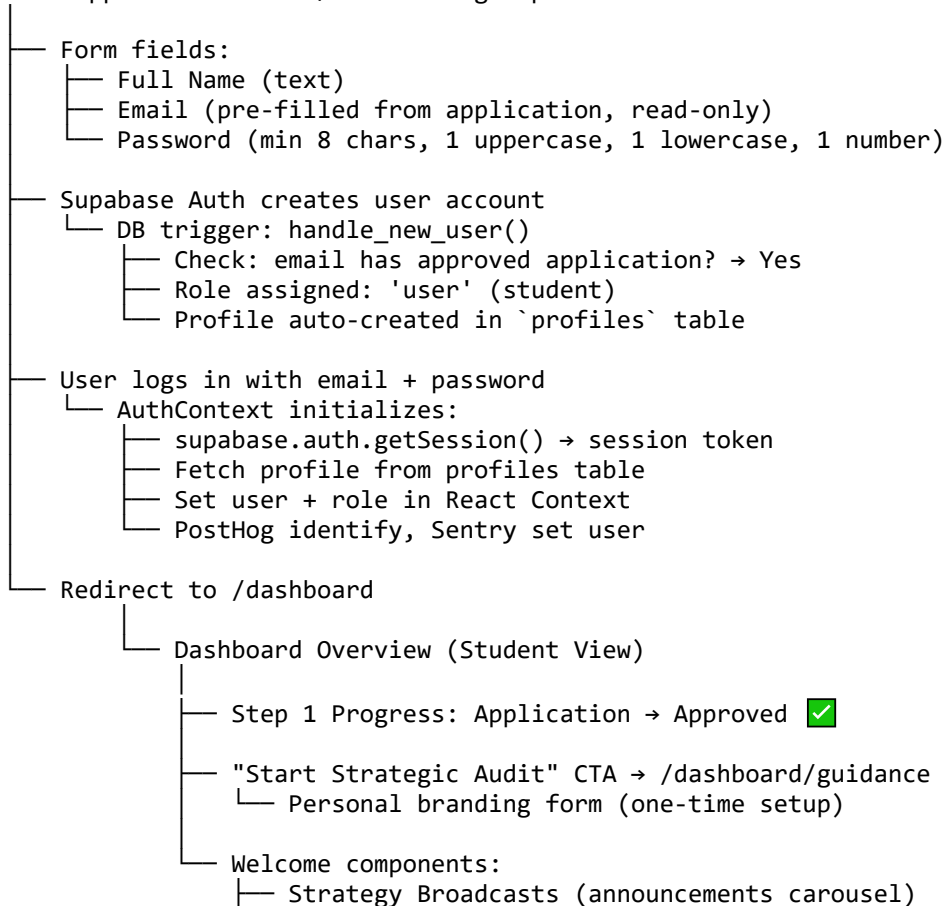

- Seriousness (1-10, progress bar)

- Source / attribution

Phase 4: Account Creation & Onboarding (Applicant → Student)

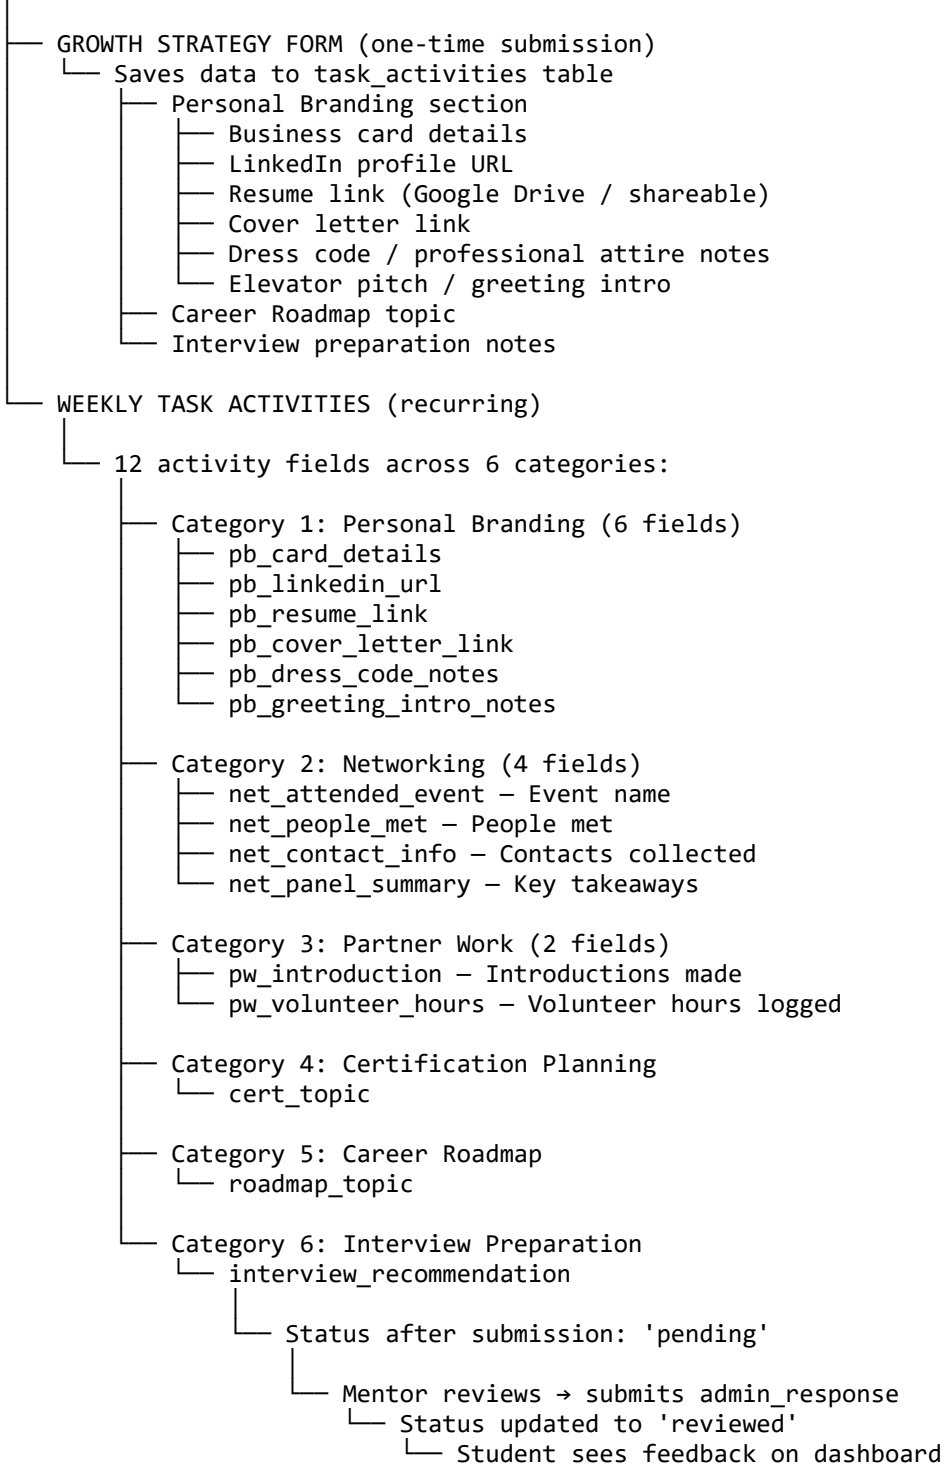

Approved applicant visits /auth → "Sign Up" tab

- Networking Events section (first event)
- Pinned Resources grid
- Quick Stats (calls count, feedback link)

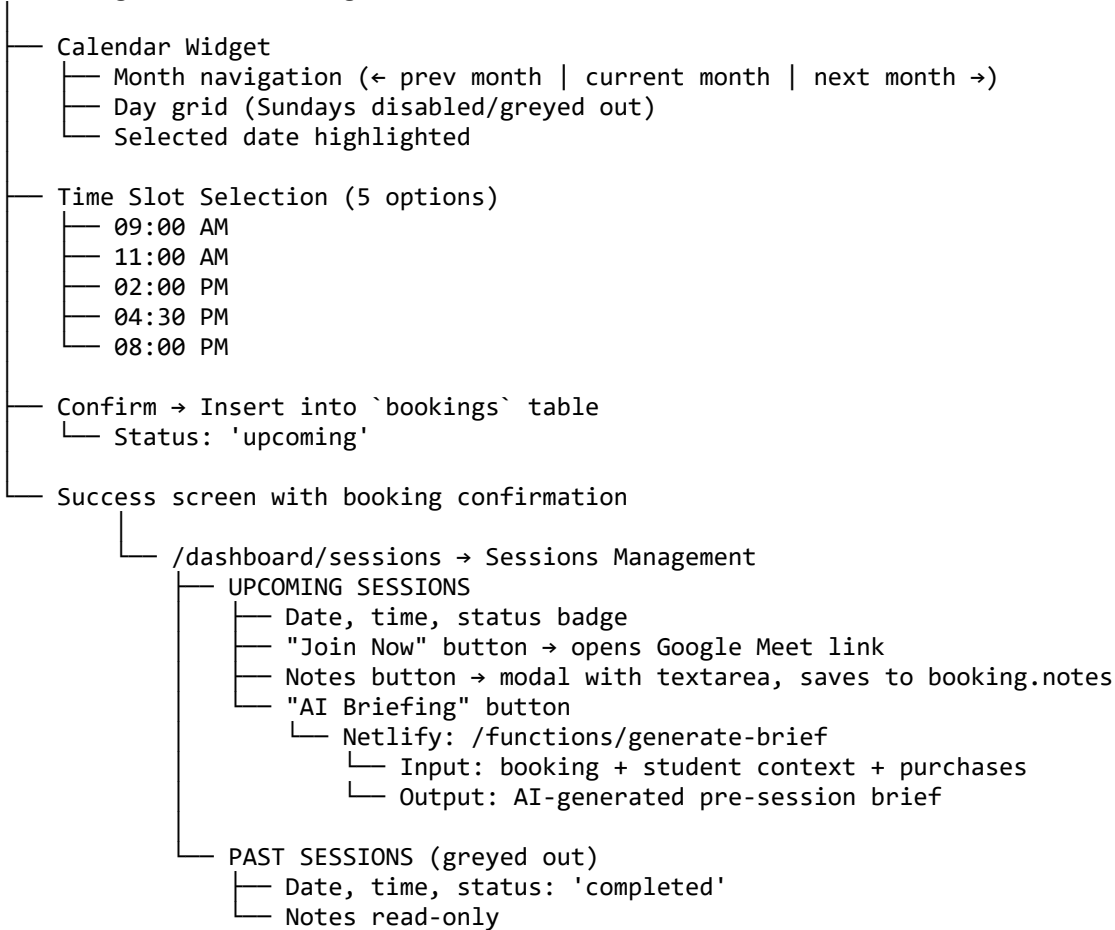

Phase 5: Active Engagement — Growth Strategy & Weekly Tasks

Student navigates to /dashboard/guidance or /dashboard/roadmap

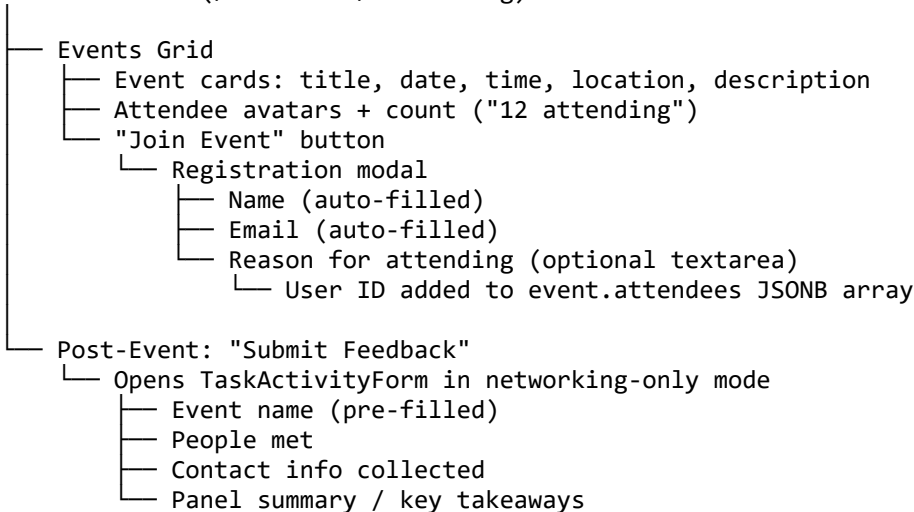

Phase 6: Active Engagement — Session Booking & Management

Student navigates to /booking

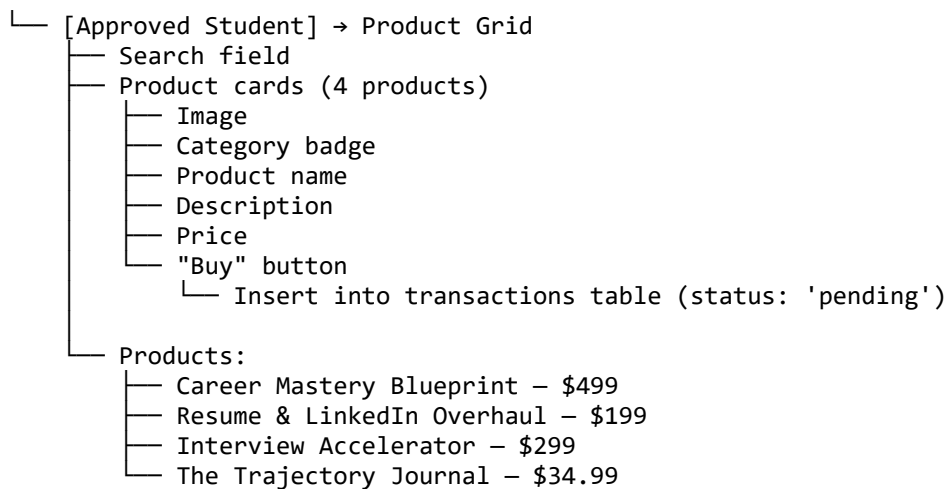

Phase 7: Active Engagement — Networking & The Vault

NETWORKING EVENTS (/dashboard/networking)

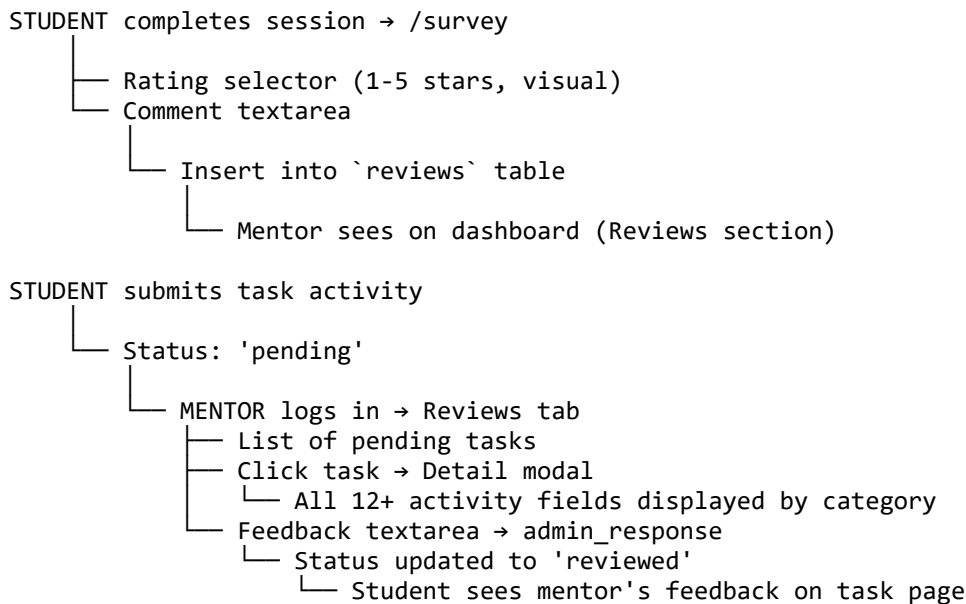

THE VAULT STORE (/vault)

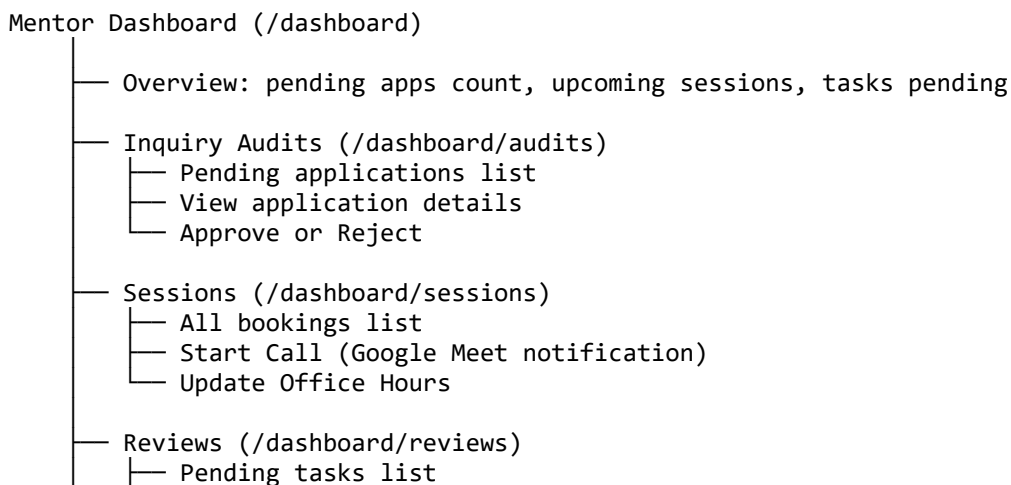

Phase 8: Feedback Loop (Student → Mentor)

Phase 9: Mentorship Oversight (Mentor Cycle)

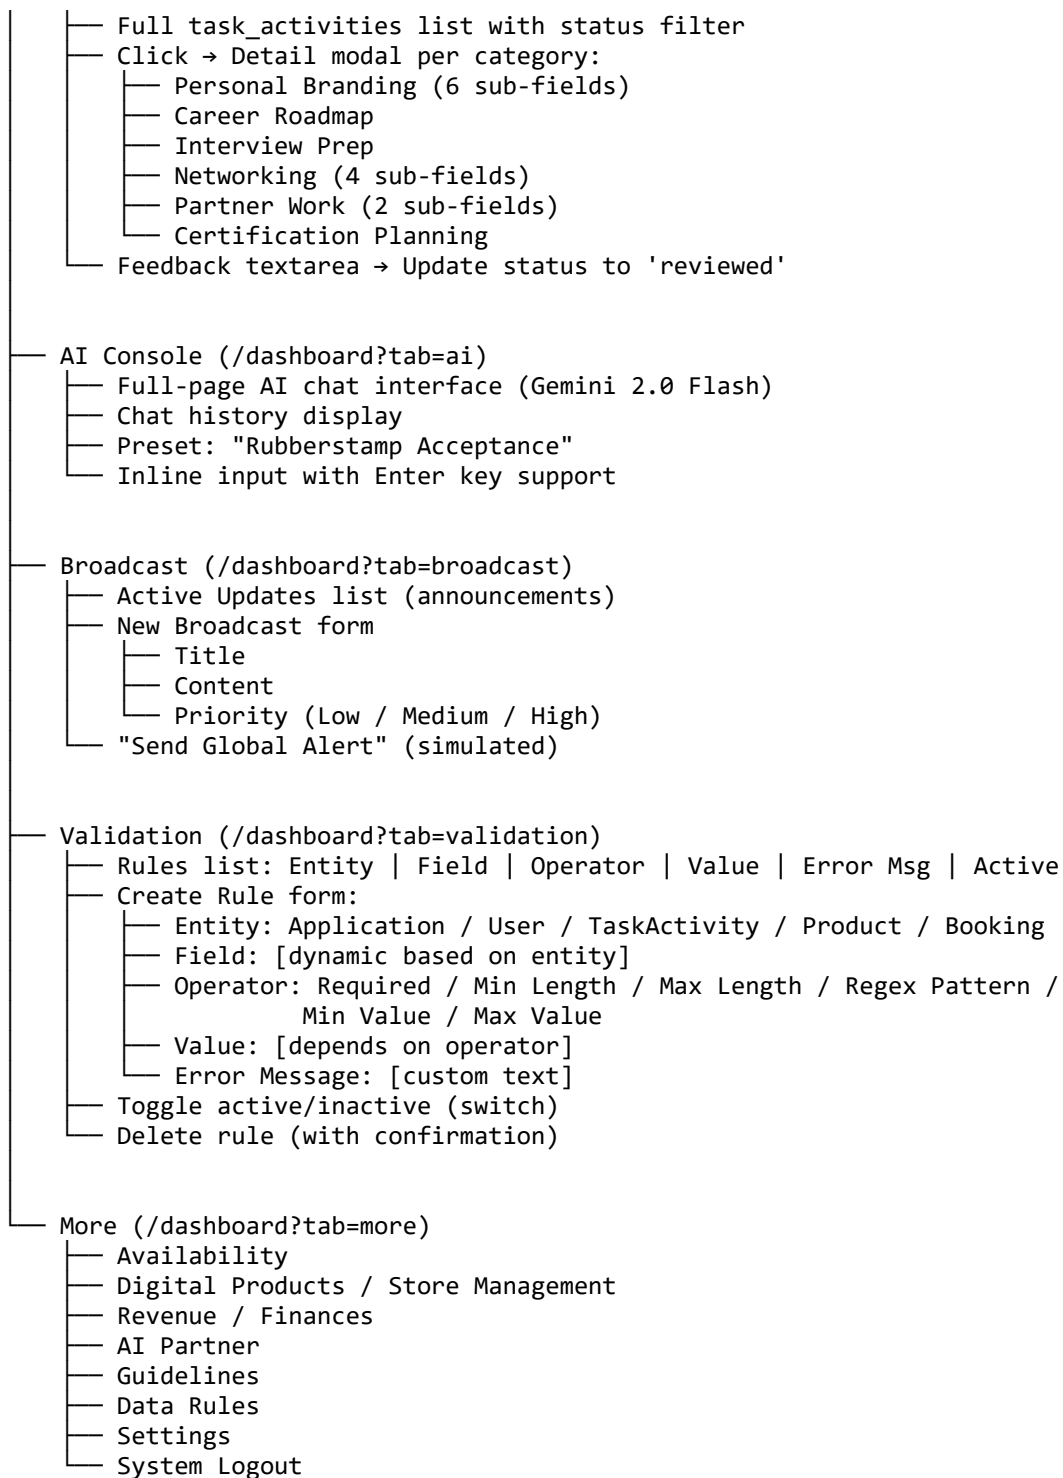

- Review task details per category
 - Submit feedback → update status to 'reviewed'
- Events (/dashboard/events)
 - Create event (title, description, date, time, location)
 - Delete event
- Mentees (/dashboard/mentees)
 - Approved mentee list
 - Message (placeholder action)
 - Remove (delete)
- Emails (/dashboard/emails)
 - List 3 templates
 - Edit subject
 - Edit body
 - Save changes

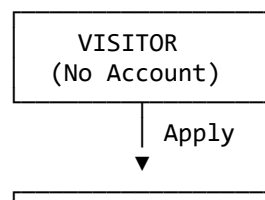

Phase 10: Administration (Admin Cycle)

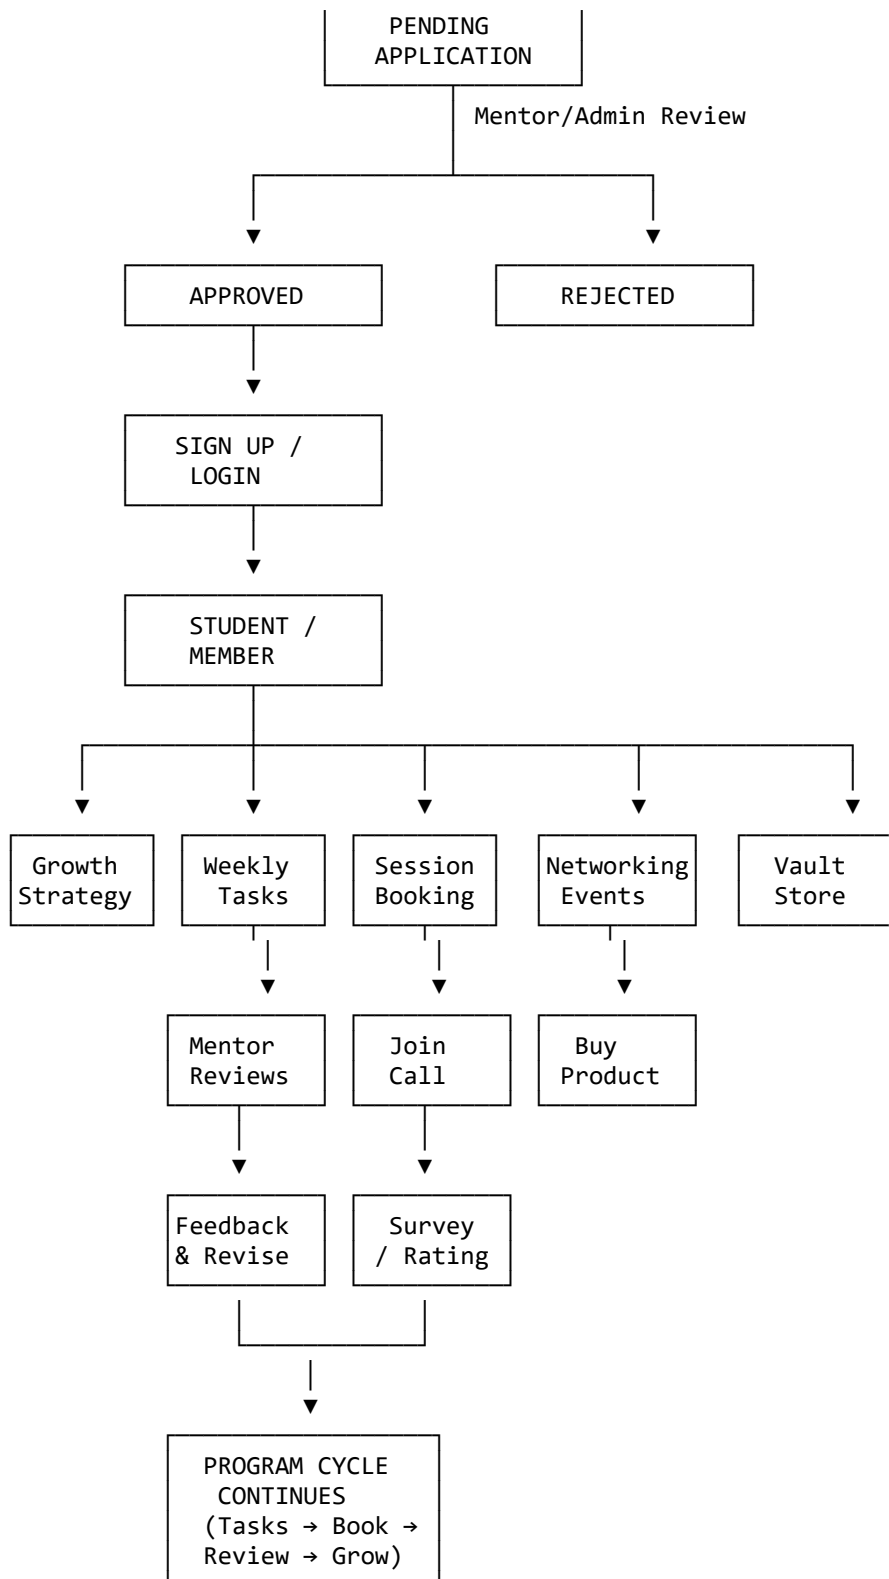

Admin Dashboard – All Mentor features PLUS:

- Admin Home (/dashboard?tab=home)
 - Stats Cards
 - New Applications (count)
 - Networking Events (count)
 - Strategy Audits (count)
 - Sessions (count)
 - Active Mentees / Completed Sessions KPIs
 - Recent Inbound Applications mini-list
 - Next Sessions mini-list
 - AI Strategy Partner quick launch button
 - Command Buttons: Schedule, Audits, Students, SOPs, Global Broadcast
- Applications (/dashboard?tab=applications)
 - Full list with status badges + filters
 - Click → Detail modal (same as mentor)
 - "AI Intelligence Audit" button
 - Gemini returns: score, summary, recommendation, redFlags[]
 - Accept/Reject with email template preview
 - "Rubberstamp Acceptance" preset comment
 - Recycle Bin
 - Deleted applications list
 - Restore (status → 'pending')
 - Permanent Delete
- Students / CRM (/dashboard?tab=students)
 - Full directory with search bar
 - Click student → Detail modal
 - Assigned Tasks list (mark status, assign new)
 - Milestones (completed indicator)
 - Mentor Notes (add new note)
 - Tags (e.g., "Strategist")
 - Task assignment: default "New Strategic Task"
- Activities (/dashboard?tab=activities)

Phase 11: Ongoing Lifecycle Diagram

4. Student / Member Features

4.1 Dashboard Overview

Aspect	Detail
Route	/dashboard (UserDashboard)
Access	Authenticated student (role: user)
Description	Personalized landing page showing progress, tasks, events, and resources

Components:

Component	Description
Growth Velocity Card	Progress percentage with visual indicator
Application Status Tracker	5-step flow: No App → Pending → Approved → Strategy → Sessions → Engaged
Tasks Pending Counter	Number of incomplete tasks
Milestones Progress	Completed vs total milestones
Strategy Broadcasts	Announcements carousel (only if approved)
Networking Events	First event with attend button (only if approved)
Active Tasks List	Tasks with "Mark Done" action (only if approved)
Milestone List	Milestone component with completion states
Pinned Resources Grid	Resource links with download icons (only if approved)
Quick Stats	Calls count, feedback link

User Story: "As a student, I want to see my overall mentorship progress and access all tools from one central dashboard."

States:

- **No application:** Shows "Apply Now" CTA
- **Pending application:** Shows "Under Review — Awaiting Feedback"
- **Approved (no strategy):** Shows "Start Strategic Audit" CTA → /dashboard/roadmap
- **Strategy complete:** Shows full dashboard with tasks, events, resources
- **Full engagement:** All components active

4.2 Session Management

Aspect	Detail
Route	/dashboard/sessions
Access	Authenticated student
Description	View upcoming and past sessions, join calls, edit notes, generate AI briefs

Features:

Feature	Detail
Upcoming Sessions List	Date, time, status badge, "Join Now" (Google Meet)
Notes Editing	Modal with textarea, saves to bookings.notes
AI Pre-Session Brief	Button → calls Gemini with booking + student context + purchases

Feature	Detail
Past Sessions	Greyed out, read-only notes

User Story: "As a student, I want to view my scheduled sessions and join them with one click."

4.3 Session Booking

Aspect	Detail
Route	/booking
Access	Authenticated student
Description	Calendar-based booking with 5 time slots

Fields:

Field	Type	Description
id	UUID	Primary key
user_id	UUID (FK→profiles)	Student who booked
user_name	string	Student's name
date	string (YYYY-MM-DD)	Booking date
time	string	e.g., "09:00 AM"
status	enum	upcoming / completed / cancelled
notes	text (nullable)	Session notes

User Story: "As a student, I want to book a strategy call at a convenient time."

UI Flow:

1. Calendar widget — month nav, day selection (Sundays disabled)
 2. Time slot picker — 5 fixed slots
 3. Confirmation — inserts booking with status upcoming
 4. Success screen
-

4.4 Growth Strategy / Roadmap

Aspect	Detail
Route	/dashboard/guidance, /dashboard/roadmap
Access	Authenticated student
Description	One-time personal branding audit + recurring weekly task activities

One-Time Growth Strategy Form:

- Personal Branding checklist (6 fields)
- Career Roadmap topic
- Interview Preparation notes

Weekly Task Activities — 6 Categories (12+ fields):

Category	Fields	Description
Personal Branding	6	Business card, LinkedIn, Resume, Cover letter, Dress code, Elevator pitch
Networking	4	Event attended, People met, Contact info, Panel summary
Partner Work	2	Introductions made, Volunteer hours
Certification Planning	1	Certification topic
Career Roadmap	1	Roadmap topic
Interview Prep	1	Interview preparation notes

User Story: "As a student, I want to submit my growth activities and receive mentor feedback."

Status Flow: pending → mentor reviews → reviewed (with admin_response)

4.5 The Vault (Store)

Aspect	Detail
Route	/vault
Access	Authenticated student (approved)
Description	Digital product catalog with 4 resources

States:

State	Behavior
Not approved	"The Vault is Locked" — "Apply for Mentorship" button → /apply
Approved	Full product grid displayed

Products:

Product	Price
Career Mastery Blueprint	\$499
Resume & LinkedIn Overhaul	\$199
Interview Accelerator	\$299
The Trajectory Journal	\$34.99

Product Fields:

Field	Type	Description
id	UUID	Primary key
full_name	string	Product name
description	text	Product description
price	decimal	Price

Field	Type	Description
image	string (URL)	Product image
category	string	Category
sales_count	integer	Number sold
status	enum	active / draft

User Story: "As a student, I want to browse and purchase digital resources to accelerate my growth."

Note: No payment gateway integration — purchases recorded as pending transactions.

4.6 Networking Events

Aspect	Detail
Route	/dashboard/networking
Access	Authenticated student
Description	Event grid with RSVP, attendee tracking, post-event reports

Event Fields:

Field	Type	Description
id	UUID	Primary key
title	string	Event name
description	text	Event description
date	string (YYYY-MM-DD)	Event date
time	string (HH:MM)	Event time
location	string	Physical or virtual location
link	string (nullable)	Join link
attendees	UUID[] (JSONB)	Array of user IDs
created_at	timestamp	Creation timestamp

Features:

- Events grid (title, date, time, location, description)
- Attendee avatars with count
- "Join Event" → Registration modal (auto-filled name/email, reason)
- Post-event "Submit Feedback" → TaskActivityForm (networking fields only)

User Story: "As a student, I want to discover and join networking events to expand my professional network."

4.7 Survey / Feedback

Aspect	Detail
Route	/survey
Access	Authenticated student
Description	Post-session feedback form

Fields:

Field	Type	Description
id	UUID	Primary key
reviewer_name	string	Student's name
reviewer_email	string	Student's email
rating	integer (1-5)	Star rating
comment	text (nullable)	Written feedback
created_at	timestamp	Submission time

User Story: "As a student, I want to provide feedback on my mentorship experience."

4.8 AI Chat Assistant

Aspect	Detail
Visibility	All authenticated pages (floating widget)
Position	Bottom-right corner
Backend	Gemini 2.0 Flash via Netlify function
Context	Career guidance, session prep, program questions

User Story: "As a student, I want to ask career and program questions via AI chat at any time."

4.9 Settings

Aspect	Detail
Route	/settings
Access	Authenticated student
Description	Account management page

User Story: "As a student, I want to manage my account settings and log out."

5. Mentor Features

5.1 Mentor Dashboard

Aspect	Detail
Route	/dashboard (MentorDashboard)
Access	Authenticated mentor (role: mentor)
Description	Consolidated view of applications, bookings, tasks, events, reviews

User Story: "As a mentor, I want to see all pending items at a glance."

5.2 Inquiry Audits

Aspect	Detail
Route	/dashboard/audits
Access	Mentor
Description	Review pending applications, approve or reject

Features:

- Pending applications list
- Application detail view (full form data)
- Approve / Reject actions

User Story: "As a mentor, I want to review incoming applications and make admission decisions."

5.3 Mentees

Aspect	Detail
Route	/dashboard/mentees
Access	Mentor
Description	List of approved mentees

Features:

- Mentee list (name, email, status)
- Message action (placeholder)
- Remove action (with confirmation)

User Story: "As a mentor, I want to see my mentees and manage the relationship."

5.4 Session Management

Aspect	Detail
Route	/dashboard/sessions
Access	Mentor
Description	View and manage bookings

Features:

- All bookings list
- "Start Call" button (Google Meet notification)
- "Update Office Hours" action

User Story: "As a mentor, I want to manage my scheduled sessions."

5.5 Task Reviews

Aspect	Detail
Route	/dashboard/reviews
Access	Mentor
Description	Review and provide feedback on student tasks

Features:

- Pending tasks list (filtered by `status === 'pending'`)
- Task detail modal showing all 12+ activity fields by category
- Feedback textarea → updates task to reviewed with `admin_response`

User Story: "As a mentor, I want to review student task submissions and provide actionable feedback."

5.6 Events Management

Aspect	Detail
Route	/dashboard/events
Access	Mentor
Description	Create and delete networking events

Features:

- Events list
- Create event form (title, description, date, time, location)
- Delete event (with confirmation)

User Story: "As a mentor, I want to create and manage networking events for students."

5.7 Email Templates

Aspect	Detail
Route	/dashboard/emails
Access	Mentor

Aspect	Detail
Description	Edit email templates sent to applicants

Templates:

ID	Trigger	Subject	Body
application_submitted	New application submitted	Editable	Editable
application_accepted	Application approved	Editable	Editable
application_rejected	Application rejected	Editable	Editable

Template Fields:

Field	Type	Description
id	text (PK)	Template identifier
subject	string	Email subject line
body	text	Email body (HTML/text)
updated_at	timestamp	Last modified

User Story: "As a mentor, I want to customize email notifications sent to applicants throughout the process."

5.8 Accounts

Aspect	Detail
Route	/dashboard/accounts
Access	Mentor
Description	Account management

User Story: "As a mentor, I want to manage my account settings."

6. Admin Features

Admins have access to ALL mentor features PLUS the following:

6.1 Admin Home

Aspect	Detail
Route	/dashboard?tab=home
Access	Admin
Description	Stats dashboard with KPIs and quick-action command buttons

KPIs:

Metric	Description
New Applications	Count of pending applications
Networking Events	Count of upcoming events
Strategy Audits	Count of pending task reviews
Sessions	Count of upcoming bookings
Active Mentees	Total active students
Completed Sessions	Total completed sessions

Command Buttons:

- Schedule — Quick link to sessions
- Audits — Quick link to application audits
- Students — Quick link to CRM
- SOPs — Standard operating procedures
- Global Broadcast — Quick announcement creation

AI Strategy Partner: One-click launch of AI chat console

User Story: "As an admin, I want a bird's-eye view of platform activity with quick access to key actions."

6.2 Applications (Advanced)

Aspect	Detail
Route	/dashboard?tab=applications
Access	Admin
Description	Full application management with AI analysis, bulk actions, recycle bin

Features beyond Mentor:

Feature	Description
AI Intelligence Audit	Calls Gemini 2.0 Flash for score, summary, recommendation, red flags
Email Preview	Shows email template before sending accept/reject
Rubberstamp Acceptance	One-click accept with preset comment
Recycle Bin	View deleted apps; restore or permanently delete

AI Analysis Output:

Field	Type	Example
score	number (0-100)	85
summary	string	"Strong candidate with clear goals in tech..."
recommendation	string	"Accept — well-prepared for the program"
redFlags	string[]	["Vague career direction", "Low seriousness score"]

User Story: "As an admin, I want AI-powered insights to make informed and efficient application decisions."

6.3 Students / CRM

Aspect	Detail
Route	/dashboard?tab=students
Access	Admin
Description	Full student directory with search, task management, milestones, notes, tags

Features:

Feature	Description
Student Directory	Full list with search bar
Student Detail Modal	Tasks, milestones, notes, tags
Task Assignment	Assign default "New Strategic Task"
Milestone Tracking	View completion status
Mentor Notes	Add and view notes per student
Tags	Add labels (e.g., "Strategist")

User Story: "As an admin, I want to manage all student relationships and progress from one place."

6.4 Activities (Detailed Audit)

Aspect	Detail
Route	/dashboard?tab=activities
Access	Admin
Description	Full task_activities audit with per-category drill-down

Detail Modal Sections:

Category	Fields Visible
Personal Branding	Business card, LinkedIn, Resume, Cover letter, Dress code, Elevator pitch
Career Roadmap	Roadmap topic
Interview Prep	Interview notes
Networking	Event attended, People met, Contact info, Panel summary
Partner Work	Introductions, Volunteer hours
Certification Planning	Certification topic

User Story: "As an admin, I want to drill into every aspect of a student's activity submission for thorough evaluation."

6.5 AI Console

Aspect	Detail
Route	/dashboard?tab=ai
Access	Admin
Description	Full-page AI chat interface with Gemini 2.0 Flash

Features:

- Full chat history display
- Message input with Enter key support
- "Rubberstamp Acceptance" preset button
- AI responses for program management questions

User Story: "As an admin, I want a dedicated AI assistant for platform management tasks."

6.6 Broadcast

Aspect	Detail
Route	/dashboard?tab=broadcast
Access	Admin
Description	Announcement CRUD with priority levels

Announcement Fields:

Field	Type	Description
id	UUID	Primary key
title	string	Announcement title
content	text	Announcement body
priority	enum	low / medium / high
created_at	timestamp	Creation time
program_type	string (nullable)	Program filter

User Story: "As an admin, I want to send announcements to all students with different priority levels."

6.7 Validation Rules

Aspect	Detail
Route	/dashboard?tab=validation
Access	Admin
Description	Dynamic form validation rule engine (no-code)

Entities (5):

Entity	Description
Application	Application form fields
User	Profile fields
TaskActivity	Growth strategy audit fields
Product	Store product fields
Booking	Session booking fields

Operators (6):

Operator	Type	Description
required	any	Field must not be empty/null
minLength	string	Minimum character length
maxLength	string	Maximum character length
pattern	string	Regex pattern match
min	number	Minimum numeric value
max	number	Maximum numeric value

Rule Fields:

Field	Type	Description
id	UUID	Primary key
field	string	Target field name
entity	enum	One of 5 entities
operator	enum	One of 6 operators
value	any	Rule value (string/number/regex)
errorMessage	string	Custom error message
isActive	boolean	Toggle on/off
created_at	timestamp	Creation time

User Story: "As an admin, I want to configure form validation rules without code changes."

6.8 More Menu

Aspect	Detail
Route	/dashboard?tab=more
Access	Admin
Description	Additional system management tools

Quick Actions:

- Availability — Set mentor availability

- Digital Products — Manage store products
- Revenue / Finances — View financial data
- AI Partner — AI configuration
- Guidelines — Program guidelines
- Data Rules — Data management rules
- Settings — System settings
- System Logout — Log out of admin session

User Story: "As an admin, I want access to all additional system management tools in one place."

7. Cross-Cutting Features

7.1 AI Integration (Gemini 2.0 Flash)

AI Feature	Input	Output	Endpoint	Trigger
Application Analysis	Full application object	score (0-100), summary, recommendation, redFlags[]	/functions/analyze-application	Admin clicks "AI Intelligence Audit"
Pre-Session Brief	booking + student context + purchased products	AI-generated brief (text)	/functions/generate-brief	Mentor/student clicks "AI Briefing"
Chat Assistant	chat history [{role, text}] + message	AI response (text)	/functions/chat	User sends message in chat widget

Fallback Behavior:

- Application Analysis: { score: 0, summary: "Analysis unavailable.", recommendation: "Manual review required.", redFlags: [] }
- Pre-Session Brief: "Brief could not be generated."
- Chat Assistant: "I'm sorry, I'm experiencing some technical difficulties..."

Validation: All AI function inputs validated with Zod schemas before processing.

7.2 Email System (Resend)

Aspect	Detail
Provider	Resend API
Templates	3 editable templates stored in email_templates table
Triggers	Application submitted → confirmation email Application approved → acceptance email Application rejected → rejection email
Template Management	Editable by mentors/admins via /dashboard/emails

Aspect	Detail
Config	RESEND_API_KEY, SENDER_EMAIL environment variables

7.3 Security

Layer	Implementation
Database	Row Level Security (RLS) on all tables
Authentication	Supabase Auth (email/password)
Authorization	Role-based (visitor/user/mentor/admin)
Rate Limiting	Contact form: 3 submissions per 5 min per IP Application: 1 per 24h per email
Password Policy	Min 8 chars, 1 uppercase, 1 lowercase, 1 number
Signup Gate	DB trigger prevents signup without approved application
Role Escalation	DB trigger prevents non-admin users from changing their role
Error Monitoring	Sentry (0.1 sample rate in production)
API Security	Auth token verified in all Netlify functions before admin operations

7.4 Analytics (PostHog)

Aspect	Detail
Events Tracked	Page views, user actions
User Identification	On login — identifies user for cohort analysis
Session Recording	Recorded with input masking for privacy
Config	VITE_PUBLIC_POSTHOG_PROJECT_TOKEN, VITE_PUBLIC_POSTHOG_HOST

7.5 SEO

Aspect	Detail
Library	react-helmet-async
Per-Page Meta	Title, description, OpenGraph tags, Twitter Cards
Sitemap	robots.txt served from dist
Structure	Semantic HTML with proper heading hierarchy

7.6 Responsive Design

Breakpoint	Target
Mobile (< 640px)	Single column, hamburger nav
Tablet (640-1024px)	2-column layouts
Desktop (> 1024px)	Full multi-column layouts

Styling: Tailwind CSS with custom design tokens (colors, spacing, typography in `src/styles/theme.ts`)

7.7 Error Handling

Aspect	Detail
Chunk Loading Errors	Auto page reload on chunk load failure
API Errors	Toast notifications via sonner
Boundary Errors	Sentry capture with user context
Form Errors	Zod validation messages displayed inline

8. Entity / Data Model

8.1 profiles

Column	Type	Constraints	Description
id	UUID	PK, FK→auth.users	User identifier
email	TEXT	UNIQUE, NOT NULL	User email
name	TEXT	NOT NULL	Display name
role	TEXT	NOT NULL, DEFAULT 'user'	visitor / user / mentor / admin
avatar	TEXT		Avatar URL
mentorship_status	TEXT		applied / approved / active / completed
joined_date	TIMESTAMPTZ		Date joined
tags	JSONB		Array of tags
notes	JSONB		Array of notes
tasks	JSONB		Array of task objects
milestones	JSONB		Array of milestone objects
created_at	TIMESTAMPTZ	DEFAULT now()	Creation timestamp

8.2 applications

Column	Type	Constraints	Description
id	UUID	PK, DEFAULT gen_random_uuid()	Application identifier
user_email	TEXT	UNIQUE, NOT NULL	Applicant email
user_name	TEXT		Applicant name
user_phone	TEXT		Phone with country code
mentor_type	TEXT		Selected mentor type
meeting_preference	TEXT		Virtual / In-Person / Hybrid

Column	Type	Constraints	Description
frequency	TEXT		Weekly / Bi-weekly / Monthly
goals	TEXT		Goals text
seriousness	INTEGER	1-10	Seriousness rating
attribution	TEXT		How they heard
source	TEXT		Source tracking
tags	JSONB		Array of tags
notes	JSONB		Array of notes
status	TEXT	NOT NULL, DEFAULT 'pending'	pending / approved / rejected / deleted
responses	JSONB		All form responses (legacy)
ai_score	NUMERIC		AI analysis score
pillar	TEXT		Program pillar
experience	TEXT		Experience level
created_at	TIMESTAMPTZ	DEFAULT now()	Submission timestamp

8.3 bookings

Column	Type	Constraints	Description
id	UUID	PK, DEFAULT gen_random_uuid()	Booking identifier
user_id	UUID	FK→profiles.id	Student who booked
user_name	TEXT		Student name
date	DATE		Booking date
time	TEXT		Time slot
status	TEXT	DEFAULT 'upcoming'	upcoming / completed / cancelled
notes	TEXT		Session notes
created_at	TIMESTAMPTZ	DEFAULT now()	Creation timestamp

8.4 task_activities

Column	Type	Constraints	Description
id	UUID	PK, DEFAULT gen_random_uuid()	Activity identifier
user_id	UUID	FK→profiles.id	Student
user_name	TEXT		Student name
status	TEXT	DEFAULT 'pending'	pending / reviewed
admin_response	TEXT		Mentor feedback
pb_card_details	TEXT		Business card details
pb_linkedin_url	TEXT		LinkedIn URL
pb_resume_link	TEXT		Resume link
pb_cover_letter_link	TEXT		Cover letter link

Column	Type	Constraints	Description
pb_dress_code_notes	TEXT		Dress code notes
pb_greeting_intro_notes	TEXT		Elevator pitch
net_attended_event	TEXT		Event attended
net_people_met	TEXT		People met
net_contact_info	TEXT		Contacts collected
net_panel_summary	TEXT		Panel takeaways
pw_introduction	TEXT		Introductions made
pw_volunteer_hours	TEXT		Volunteer hours
cert_topic	TEXT		Certification topic
roadmap_topic	TEXT		Career roadmap topic
interview_recommendation	TEXT		Interview prep notes
created_at	TIMESTAMPTZ	DEFAULT now()	Submission timestamp

8.5 events

Column	Type	Constraints	Description
id	UUID	PK, DEFAULT gen_random_uuid()	Event identifier
title	TEXT	NOT NULL	Event title
description	TEXT		Event description
date	DATE		Event date
time	TIME		Event time
location	TEXT		Location
link	TEXT		Join link
attendees	JSONB	DEFAULT '[]'	Array of user IDs
created_at	TIMESTAMPTZ	DEFAULT now()	Creation timestamp

8.6 products

Column	Type	Constraints	Description
id	UUID	PK	Product identifier
full_name	TEXT	NOT NULL	Product name
description	TEXT		Product description
price	DECIMAL	NOT NULL	Price
image	TEXT		Image URL
category	TEXT		Category
sales_count	INTEGER	DEFAULT 0	Number sold
status	TEXT	DEFAULT 'active'	active / draft
created_at	TIMESTAMPTZ	DEFAULT now()	Creation timestamp

8.7 reviews

Column	Type	Constraints	Description
id	UUID	PK	Review identifier
reviewer_name	TEXT		Reviewer name
reviewer_email	TEXT		Reviewer email
rating	INTEGER	1-5	Rating
comment	TEXT		Review comment
created_at	TIMESTAMPTZ	DEFAULT now()	Submission timestamp

8.8 transactions

Column	Type	Constraints	Description
id	UUID	PK	Transaction identifier
user_id	UUID	FK→profiles.id	Student
product_id	UUID	FK→products.id	Product purchased
amount	DECIMAL		Transaction amount
status	TEXT		successful / pending / failed
created_at	TIMESTAMPTZ	DEFAULT now()	Transaction timestamp

8.9 validation_rules

Column	Type	Constraints	Description
id	UUID	PK	Rule identifier
field	TEXT	NOT NULL	Target field name
entity	TEXT	NOT NULL	Application / User / TaskActivity / Product / Booking
operator	TEXT	NOT NULL	required / minLength / maxLength / pattern / min / max
value	TEXT		Rule parameter value
errorMessage	TEXT		Custom error message
isActive	BOOLEAN	DEFAULT true	Toggle
created_at	TIMESTAMPTZ	DEFAULT now()	Creation timestamp

8.10 email_templates

Column	Type	Constraints	Description
id	TEXT	PK	Template identifier
subject	TEXT		Email subject
body	TEXT		Email body content
updated_at	TIMESTAMPTZ		Last modified

8.11 announcements

Column	Type	Constraints	Description
id	UUID	PK	Announcement identifier
title	TEXT		Announcement title
content	TEXT		Announcement body
priority	TEXT		low / medium / high
program_type	TEXT		Optional program filter
created_at	TIMESTAMPTZ	DEFAULT now()	Creation timestamp

8.12 contact_messages

Column	Type	Constraints	Description
id	UUID	PK	Message identifier
name	TEXT		Sender name
email	TEXT		Sender email
phone	TEXT		Sender phone
subject	TEXT		Message subject
message	TEXT		Message body
